

FOR A JUST SOCIETY

The Association for Socio-Economic Advancement of Bangladesh (ASEAB) is a non-government, non-political, and voluntary development organization founded and run by a group of committed professionals, social workers, and multi-disciplinary experts. For over 30 years, ASEAB has been contributing to uplifting the miseries of the poor and the needy communities facing multi-faceted social deprivation and long-held injustices.

Through various projects, the organization aims at ending poverty, and improving the lives and prospects of the destitute across Bangladesh. The head office of ASEAB is situated in the village of Khayerbagan, 10 kilometers from the district headquarters of Pabna, located in the catchment of the great river Padma.

In the last three decades, ASEAB played a significant role in transforming the lives of the people of Char areas of Pabna, where acute poverty, starvation, illiteracy, floods, river erosion, habitat loss, and a decline in cultivable land have been prevalent. In this context, ASEAB commits its resources at relieving individuals from the grip of enduring poverty and hunger. Since its inception ASEAB have covered more than 10 of 17 SDGs to mitigate social injustice, deprivation, and inequality across almost all the divisions of Bangladesh through different initiatives. As of 2023, ASEAB has served about a million beneficiaries and their families.

ASEAB has been working and affiliated with different national and international organizations and networks since its inception. The organization obtained registration with the NGO Affairs Bureau in 1995, the Trust Act in 2002, the Microcredit Regulatory Authority in 2008, and the Joint Stock Company in 2009.

REBUILDING SHELTER FOR ROHINGYA REFUGEES

PROJECT DURATION
2021 TO 2023

Funded By
BDesH Foundation, USA

Beneficiary

Refugees in the Rohingya Camp

PRESENT TARGET

450 | **2700**
SHELTERS | FAMILY MEMBERS

FUTURE TARGET

4000 | **28000**
SHELTERS | FAMILY MEMBER

Within 2025

Project Background

Rebuilding Shelter for Rohingya Refugees is a project initiated in 2021 in response to the devastating mudslides that occurred in the Rohingya refugee camps in Kutupalong, Cox's Bazar, Bangladesh. The project provides emergency shelter along with food, water, and medical assistance for the Rohingya refugees. It helped them to rebuild their homes and their lives after the disaster in between 2021 to 2023. ASEAB's commitment to promoting sustainable and long-term solutions is reflected in the project.

Project Objective

Mudslide is a common natural calamity that the Rohingya refugees have to face on a regular basis. This project is working with an objective to support these displaced people to rebuild their shelters that get damaged or destroyed by this natural disaster. Alongside these, the project also helps the Rohingya people to ensure access to clean water, food, and medical care. The refugees are also provided with the tools, skills and resources they need to start over. The project strives to make the refugee community more resilient and self-reliant by working closely with local leaders and groups to find community-based solutions to the problems they face.

Projects Activities

The project team works closely with the camp representatives of the government to identify and collect the list of refugees who need shelter. After compiling the list of homeless refugees, the project team obtains approval for the shelter designs from relevant authorities. The design of the shelters is critical as they have to be safe and suitable for the local environment. Based on the approved designs, the project team constructs shelters for homeless refugees. The construction process is carried out with the utmost care and attention to detail, ensuring that the shelters are safe, durable, and comfortable. Once the shelters are constructed, the project team works closely with the camp representatives of the government to hand over the shelters to the refugees.
